SUMMARY

Experienced technology lead and modern .NET Cloud Architect with over 20 years experience in real estate, finance, and automotive sectors. Experienced at scaling teams, architecting enterprise platforms and driving product delivery from conception to support.
Deep expertise in Microsoft stack (.NET up to v10), cloud infrastructure (Azure/AWS), and agile leadership. Experienced backend engineer - all things API's, Servers, Serverless and Cloud Infrastructure.
Strong history of successful technical leadership across startups and international teams.

WHAT DRIVES ME

I build scalable backend systems, deliver products fast and grow high-performing teams.
Passionate about bridging business and tech to bring value to companies and their employees

EXPERIENCE

.Net Developer Lead - Angle Auto Finance (Australia) | Sep 2025 - March 2026

- Team lead for 5 senior developers using .NET 8, C#, Azure, Azure DevOps, MS-SQL, Jira
- Initiated stronger coding standards, testing uplift and more detailed PR review process.
- Uplifted select CI/CD pipelines with stronger NuGet security.
- Collaborated with PO/BA's to realise business requirements
- Learn and uplifted FIS Ambit Enterprise features - BLD's, Workflow chains, etc
- Triaging issues leveraging Azure App Insights

Technology Lead - Syion.com (Australia + Singapore) | May 2024 – Jun 2025

- Led a team of 10 engineers within a fast-paced consultancy, delivering concurrent multi-client projects at pace
- Modernised an automotive dealership's vehicle management platform, migrating from .NET 4.6.2 to .NET 9
- Optimised AWS infrastructure, reducing costs and lowering overall cloud spend ~ -47%
- Owned end-to-end delivery using agile methodologies
- Managed staff across the full lifecycle: recruitment, mentoring, performance reviews, and budget oversight
- Led client engagement including scoping, quoting, and milestone tracking
- Elevated code quality and team capability through pair programming, code reviews, and internal technical presentations

Senior Software Engineer - Homely.com.au (Australia) | 2013 – May 2024

- Drove architecture decisions across API, data, and infrastructure layers
- Led standups, retros, and sprint planning for cross-functional teams
- Mentored junior developers; managed on boarding and hardware setup for new hires
- Championed new tech adoption (OnPrem to Azure, containerisation, Google APIs)
- Reviewed team PRs and led engineering hiring interviews

Senior Software Engineer - StreetAdvisor (Australia) | 2007 - 2013

- Created Homely.com.au (everything but Front End).
- Manage importing real estate Agent data (up to 10's of thousands of files/day).
- Near instant autocomplete for suburb and agent search.
- Creation and maintenance of all Azure infrastructure.
- Geospatial mapping of suburbs.
- Project management - requirements to hiring.

Software Engineer - Stargate Group • Full-time (Australia) | 2000 - 2007

- Created NetVal: first online property valuation portal in Australia
- Helped create and define the LIXI Valuations standard.
- OnPrem DevOps for World Originate : Independent Property Loan Management software

TECHNICAL SKILLS

Backend & Application Development

Modern .NET (Core ⟶ .NET 10)
RESTful API design
Distributed systems architecture (scalable microservices, inter-service communication, resiliency patterns)
Event-driven systems (Azure Service Bus / RabbitMQ)

Data Architecture & Storage

Multi-database system design (SQL & NoSQL)
MS SQL & PostgreSQL
Redis (caching strategies)
MongoDB & RavenDB
ElasticSearch (search indexing & optimisation)

Observability & Production Engineering

Application Insights, Seq, Sentry, New Relic
Structured logging & monitoring
Performance tuning & system resilience
Production incident diagnosis & optimisation

Cloud & DevOps Engineering

Azure & AWS infrastructure design
Docker containerisation
CI/CD pipelines (GitHub Actions, Jenkins)
Infrastructure automation & environment management

Security & Identity

IdentityServer & Auth0 integration
Secure authentication & authorisation design
API security best practices

Tooling & Scripting

GitHub, Azure DevOps, JIRA, Slack, Teams
PowerShell & Bash
Postman

AI-Augmented Development

Claude.ai (Anthropic) — used for architectural reasoning, technical design discussions, documentation drafting, and problem decomposition
GitHub Copilot — integrated across Visual Studio, VS Code, and GitHub for intelligent code completion, PR review assistance, and inline suggestions

EDUCATION

Bachelor Applied Science (Computer Science) RMIT University 1997
